

Project Design Phase-II
Data Flow Diagram & User Stories

Date	24 October 2023
Team ID	Team-592600
Project Name	Alzheimer disease prediction
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Data flow diagram for Alzheimer disease prediction:

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web user)	Upload data	USN-1	As a user, I can medical imaging data to the web application	The provided input is accepted by the application	High	Sprint-1
		USN-2	As a user, I will be able to see the results for predictions based on the provided input data	The result generated by the ML model is displayed in the application	High	Sprint-2
		USN-3	As a user, I can undo my input incase of providing any wrong input data	The web application has to be versatile to handle mis inputs	Low	Sprint-2
		USN-4	As a user, I am able to understand and interact with the application easily	The web application is user friendly	Medium	Sprint-1
